

Introducing John Deere Certified Rebuild Centers

MACHINE SOLUTIONS NEAR YOU

Rebuilding a piece of construction equipment is a major undertaking and requires a special set of skills, tooling, and processes to make sure the job gets done right. The John Deere Certified Rebuild Center program sets the bar high to ensure that your machine rebuild is done efficiently and professionally, and delivers on your expectations by designating specific dealership locations as Certified Rebuild Centers.

Here's what a John Deere Certified Rebuild Center can do for you:

- Thoroughly assess the condition of the machine and provide expert advice on the areas of highest concern

- Provide you with multiple rebuild options to ensure the work being done meets the needs of your business
- Execute your customized machine rebuild plan on schedule, and on budget, to minimize disruption to your operation

Whether you are looking to make your machine look, feel, and function like brand new, or if you just need a plan to extend the machine's life by a few thousand hours, your local Certified Rebuild Center can help you design a customized rebuild plan that meets your needs and fits your budget. The result is a rebuilt machine you can count on, at a lower hourly cost than buying a new machine — **it's the John Deere way.**
