

RULES TO LIVE BY

Some of the best features on John Deere lawn equipment are designed to ensure safe mowing.

Seat safety switch stops the mower blades if you forget to turn them off before leaving the seat.

Interlock system assures the engine will not start unless mower blades are turned off, brake is on, and traction drive is disengaged.

Reverse Implement Option (RIO) stops the mower blades if you forget to disengage the mower blades when backing.

Read your Operator's Manual to familiarize yourself with your equipment and to maximize its utility.

Discharge chute helps protect you and bystanders from flying debris. The discharge chute should always remain in place.
